The Paradigm Shift: Reporting for Transparency, Compliance and Accountability

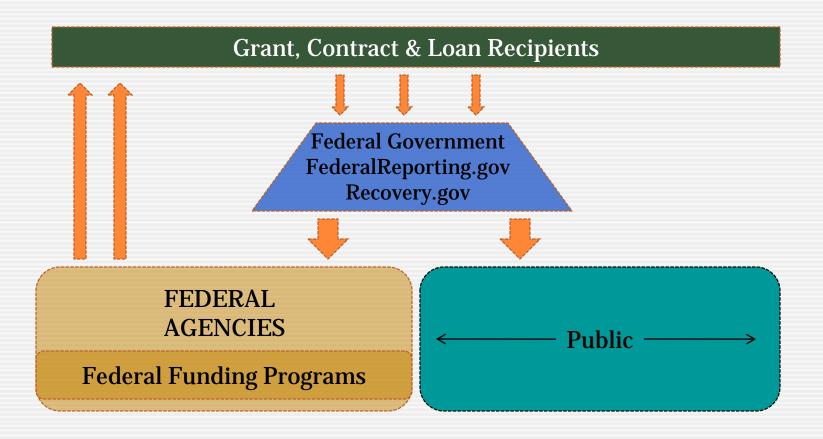

Federal Reporting Status Quo

The Reporting Paradigm Shift

System Architecture for ARRA to Support Accountability and Transparency

FederalReporting.gov

Recipient In-Bound Reporting

Database

- Recipient Registration
- Recipient Reporting
- •Recipient Corrections
- Agency Validation
- •Reporting Activities Recorded for Audit Trail

Data Replication

Recovery.gov

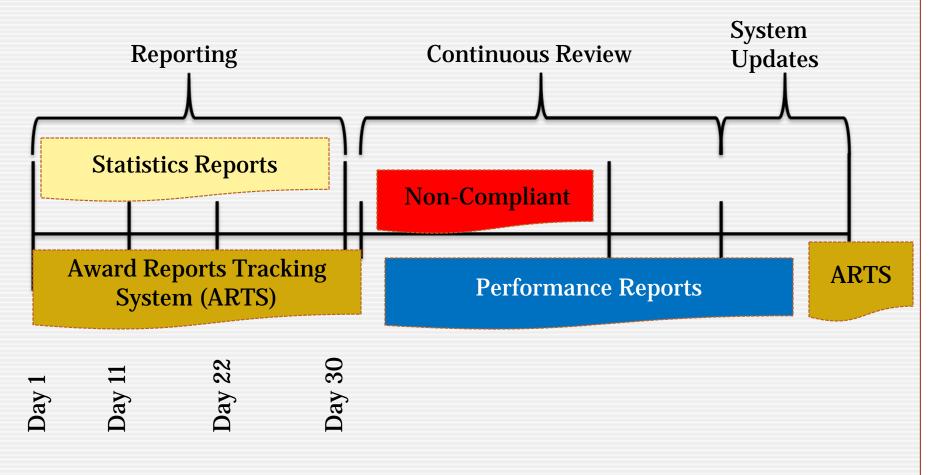

Public Out-Bound Reporting

Database

- Public Web Portal
- Data Storage
- •Data Visualization/Presentation
- •Content Management
- •Pre-Complied Reports
- Download of Raw Data

Timeline of a Reporting Quarter

Tools and Techniques for Compliance Federal Reporting

FederalReporting.gov Provides

- Daily extracts of recipient data for agencies
- State extracts
- Ability for bulk reporting from recipient

ARRA Reporting Tracking System (ARTS):

- Designed to identify when recipients report or not--based on initial submission
- Tracks until reports are marked "final and complete"

Review and Changing Data

- Review and comment period during reporting
- Continuous review between reporting periods—change data
- Automated Data Change request tool

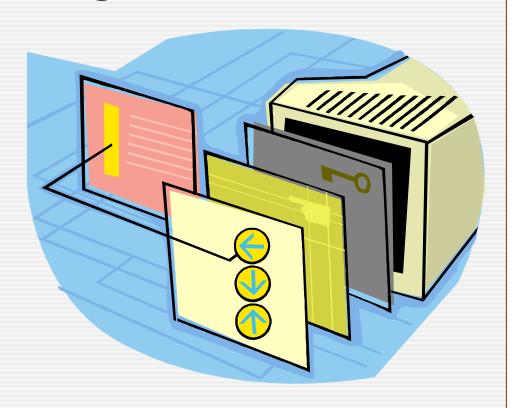

Automated Report Tracking System (ARTS)

Data Change Process

- Identify errors
- Submit change request through ADC tool
- View requests
- Evaluate requests
- Process requests
- Receive notifications
- Track requests
- Publish requests

Automated Data Change (ADC) Tool

- Provides access through FederalReporting.gov
- Allows request changes only on existing reports
- Provides feedback, approvals, and denials directly to requestor
- Tracks requests throughout the process trail
- Generates notifications at key milestones

What Changes Can Be Requested?

- Deactivate
- Link Reports
- Mark as 'Final'
- Other
 - Changes to any other data fields can be requested, except...
 - Job Numbers → cannot be changed

Why Make Data Changes

- Change records that your recipient will no longer address
- Change data to reflect correct awarding agency,
 Treasury Symbol, CFDA because report is final and project is complete
- Deactivate non-ARRA reports
- Eliminate duplications

When to Make Changes

- ADC should not be used to make changes that can be made in the current quarter (e.g., updates to the award amount).
- Recipients and agencies should concentrate on the current quarter reporting.
- Changes should be to past quarter records.
- ADC was deployed on April 2011

Recovery.gov

- Recovery.gov is Transparent and Accountable
 - Identifies reporters and non-compliers
 - Identifies funded projects
 - Uses maps to identify location of projects
 - Downloadable data for use—updated on a regular basis
 - Searchable information
 - Recipient Profile—New Feature

NAVIGATING TO RECIPIENT PROFILE SEARCH FROM RECOVERY.GOV

Step 1: Where Is The Money Going?

- •Hover over or click on: "Where Is The Money Going?"
- •Select: Recipient Reported Data

Step 2: Recipient Reported Data

RECIPIENT REPORTED DATA

All data in the Recipient Reported Data section comes from the recipients of federal contract, grant, and loan awards (entitlements and tax benefits paid under Recovery are not included). In this section, you will see the cumulative data for February 17, 2009 -- September 21, 2011.

The job data reported by recipients is for Quarter 2, 2011 (April 1, 2011 -- June 30, 2011) only.

Projects Map - Recipient data geocoded to the project's place of performance.

Recipient Profile Summary — See all the information about each recipient, including number of awards, amount awarded, and relationships to other recipients.

Quarterly Summary — Funds awarded and received, number of jobs, and completion status of projects by quarter.

<u>State/Territory Summaries</u> – Recipient information by state, including total funds received, jobs, top zip codes, and more.

Jobs Summary - Top agencies, programs, and contracts that funded jobs

<u>State/Territory Totals by Award Type</u> – State-by-state breakdowns by federal contract, grant, and loan awards

<u>State/Territory Totals by Agency</u> – The breakdown of the number and amounts of awards and the jobs funded by each federal agency.

Late Reporters - Information on how many recipients reported after the close of reporting.

<u>Changed Reports</u> — Changes made to reports from the July 2011 reporting period.

See how jobs are calculated.

For information on recipients of Education Jobs Fund awards, visit education jobs fund.gov.

ROC / Accountability Module Initial Risk Assessment

All recipients are put through a risk model using variables that are constantly being monitored for relevancy.

ROC Process Flow:

Accountability

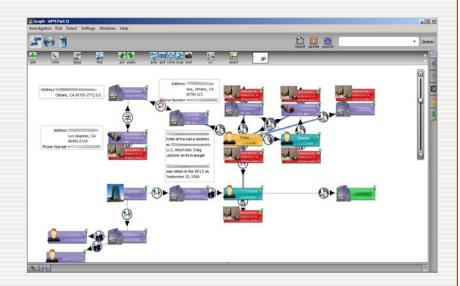

- Hotline
- ROC evaluations and referrals to IGs
- Non-compliers
- Special projects
- Proactive prevention efforts by Board, Agencies, and Inspectors General – identify and prevent fraud at an early stage – FastAlert (in development)

Key Processes in the ROC:

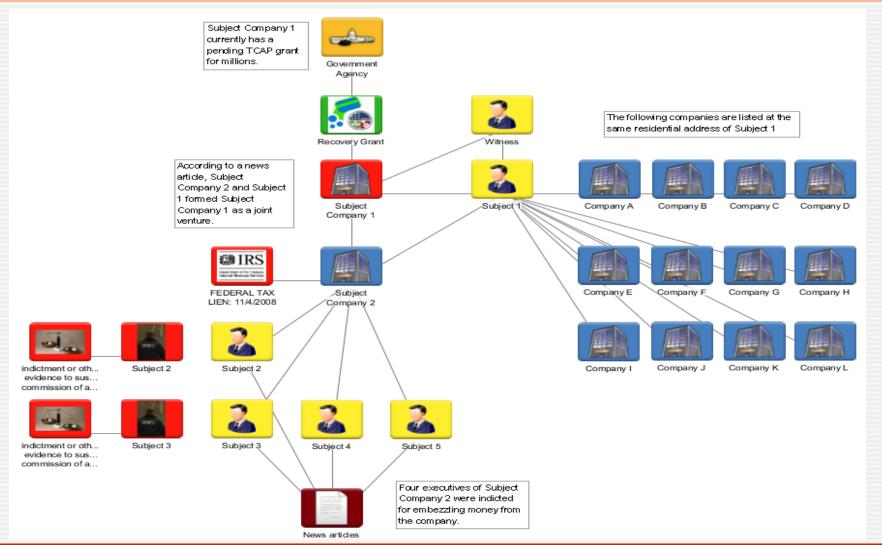

Three key processes:

- Screening
- Analyses
- Predictive Modeling
- We incorporate an in-depth fraud analysis capability, utilizing the vast amount of public information about companies receiving Recovery funds in order to identify non-obvious relationships between legal entities.
- These relationships will unveil facts that may not have been transparent to government officials at the time of contract or grant award. These relationships may result in leads and observations for investigations and audits, identifying an added risk factor, or identifying excluded parties receiving Recovery funds.

ROC Analytics: Sample Case

Datasets Currently Used by the ROC

- Regulatory Data Corp (RDC)-over 13 million risk relevant global public records
 Recovery.gov recipient and agency reporting information
 *RATB Fraud Hotline complaint information
 *Recovery IG complaint information
 *RATB internally-generated procurement issues and observations
 Central Contractor Registration (CCR)
 Excluded Parties List System (EPLS)
 Health and Human Services (HHS) Excluded Entities List

- 9. Death Master File
- 10. IRS Auto-Revocation List (ARL)
- 11. Federal Procurement Data System (FPDS)
- 12. USASpending.gov
- 13. Federal Assistance Award Data System (FAADS)
- 14. Dun and Bradstreet (D&B) Data- over 192 million records
- 15. Accurint/LexisNexis
- 16. Online Representations and Certifications Application (ORCA)
- 17. Public Access to Court Electronic Records (PACER)
- 18. *FinCEN
- 19. CLEAR
- 20. Small Business Administration Dynamic Small Business Search
- 21. State Records
- 22. Social Networking sites FaceBook & Linked-In

ARRA:New Concepts for the Future

Moving into the Future

with

The Recovery Model

Universal Award ID Concept

- IG Paper on ARRA Data Quality—recommends use of standard award ID for ARRA awards to improve data quality
- Recovery Board white paper further outlines the need for a government-wide award ID that is:
 - standard in format
 - easily identified
 - applied to all funding awards
 - does not intrude on current agency systems/processes
 - may be generated from a central point

GATB Reviewing Universal Award ID Concept

ARRA Completely Transparent Close-Out

- Developing a public close-out or reconciliation for ARRA Awards
 - Publish when an award is "closed-out"
 - Allows the public to see the final reconciliation for the awards
- Identifying "close-out"
 - Reports marked "final and complete" from the recipient can identify the beginning of "close-out"
 - Include agency acceptance
- Completes the life-cycle of an ARRA award

ARRA Innovation for the Future

ARRA and Recovery Board the innovative model shows:

- Government-wide reporting can be done
- > Basic standard data and central collection can reduce reporting burden
- ➤ Central reporting reduces timeframe for public and management receiving decision-making information
- ➤ Can make spending data available in useful formats for all stakeholders
- > Innovative and flexible technology can be quickly implemented
- Areas for standardization (award IDs)
- Sub-recipients can report & with amount awarded
- > Data quality techniques can be established government-wide
- > Data review and correction tools available for stakeholders
- **▶** Public knowledge of Federal funding activities
- > Technology supporting fraud, waste and abuse
- Developing risk and common due diligence capabilities (ROC)

ARRA: The Changed Reporting Paradigm

- 1. Proven that government-wide reporting can happen—high compliance rate—can continue
- 2. Government can provide a useable reporting tool that can be enhanced for recipients—can continue
- 3. Government can publish quality data that links expenditures to obligations for each award--can continue
- 4. Agencies have proven that report reviews can be timely—if given the proper tools—can continue
- 5. Categorized awards into functional areas from various agencies—similar programs to similar programs—can continue
- 6. Sub-recipients are reporting is important to understanding funding and performance of awards—can continue
- 7. Basic performance information can help manage awards, programs and departments' priorities—using the 99 data elements—can continue

The Future is Here

Recovery tackled:

Newer technology for government to offer more support to stakeholders Simplified government-wide reporting requirements Timely reports to timely published information

Reality for the Future:

Data Act more explicit

Creation of GATB

New Federal Assistance Reform Council

Needed for the Future:

Universal Identification and Standardization
