Welcome Back CIGIE ERM Subgroup—Implementing Risk Assessment for Audit Planning Purposes

After nearly a year hiatus, the CIGIE ERM Subgroup – Implementing a Risk Assessment for Audit Planning Purposes is considering options to reignite their efforts. They are examining opportunities to maximize value to our OIG community. Especially in OIG’s response to the coronavirus (COVID-19) pandemic.

This past year, we have experienced a pandemic of historical proportions which presents inherent risks to our programs and operations. COVID-19 is currently changing how OIG organizations conduct pandemic response oversight, while managing an extremely volatile risk environment. In addition, the pandemic has shown OIG leaders that it is imperative to implement an agile approach to work planning. Specifically, the formal and deliberative processes with which OIGs traditionally followed to plan, fund, authorize, and execute projects may need to be adjusted to respond rapidly with the urgency needed for audit planning in an ever-changing environment.

We will provide additional information in the near future, including volunteering opportunities as we strive to synchronize our efforts with other CIGIE committees.

The chairs for this subgroup are Shellie Purnell-Brown spurnell-brown@fec.gov and Jonelle Pianta jpianta@hudoig.gov.

Jessica Southwell Chair, ERMWG - DOL OIG
Temika Edwards Co-Chair, ERMWG - DHS OIG

CIGIE’s ERMWG contributes to the promotion and implementation of ERM principles in accordance with OMB Circular A-123 within the offices of the Inspectors General (OIG) community. For the latest, visit the ERMWG page on the CIGIE website.
On behalf of the Audit Committee and the Enterprise Risk Management Working Group, I am pleased to announce the publication of the Inspectors General Guide to Assessing Risk Management.

Those individuals who have worked on this guide truly deserve praise for their efforts, so please commend your colleagues for their hard work. This guide provides information to assist each OIG in creating a program to assess their respective agency’s ERM process.

Mike Ware  
Inspector General, Small Business Administration  
Chair, CIGIE Audit Committee

Available now on the CIGIE ERM Working Group webpage, under ERM Resources.
Top Management and Performance Challenges Facing Multiple Federal Agencies Report

In February 2021, the Council of the Inspectors General on the Integrity and Efficiency (CIGIE) published the second Top Management and Performance Challenges Facing Multiple Federal Agencies report for their respective Federal Offices of Inspector General (OIGs) pursuant to the Reports Consolidation Act of 2000. This report summarizes the top challenges facing their respective agencies from a list of commonly occurring challenges.

OIGs identified the following seven challenges areas as the most significant risk impacting their agencies achievement of strategic goals and objectives.

- Information Technology Security and Management
- Human Capital Management
- Financial Management
- Homeland Security, Disaster Preparedness, and COVID-19
- Procurement Management
- Grant Management
- Performance Management and Accountability

Read the full report at CIGIE.
ERM Workshop 2021

The purpose of the workshop is to provide participants with practical insight and tools to help to continue to build out Enterprise Risk Management (ERM) and to use ERM to drive real and sustainable organizational value.

The workshop will include presentations as well as facilitated virtual breakout rooms, where we move from academic discussions to "how-to" explanations and examples. The small, facilitated groups will enhance opportunities for both hands-on work and Q&A.

The last day to register is Monday, April 12, 2021 at midnight ET. No exceptions will be made after this date.

For additional ERM training resources, check out Exhibit B of the Inspectors General Guide to Assessing Enterprise Risk Management or the ERM Training Catalogue, which includes classroom and web-based training options.
AGA offers a myriad of methods for you to receive training and to grow your specific skill set virtually!

- AGA’s webinars, generally offered twice monthly on Wednesdays, focus on timely and relevant topics in government financial management, such as shared services, fraud prevention, budgeting, internal controls and the DATA Act.
- Individuals can earn valuable CPE through quizzes that can be taken after reading our quarterly Journal of Government Financial Management.
- Access recordings from previous AGA events and earn CPEs at your pace, on your schedule!
- AGA also offers opportunities to attend via virtually from home/office at our national training events.

For additional information, visit AGA’s conference site.

NC State Podcast on ERM and Coronavirus

The rapidly evolving coronavirus is triggering all kinds of risks impacting multiple aspects of an organization. While strong risk management practices can’t stop the spread of the coronavirus or prevent other pandemic risk events, enterprise risk management processes can help organizations anticipate the impact of these kinds of unforeseen, extraordinary events. Mark Beasley, Director of the Enterprise Risk Management Initiative at NC State, was recently interviewed by Financial Management magazine about lessons from the global outbreak of the coronavirus. Listen to the podcast.

Using ERM Principles To Help Navigate Risks Triggered by COVID-19
by NC State ERM Initiative Staff

Applying ERM core principles to manage the multitude of risks triggered by COVID-19 is more paramount than ever. During a NC State ERM Initiative Podcast, Mark Beasley, Director of Enterprise Risk Management Initiative, outlined how key concepts from enterprise risk management might provide a framework for organizing how to prioritize and respond to the most critical risks triggered by COVID-19.

Some tips Mark highlighted for managing risks for the “Here and Now” and for later when we rebuild once COVID-19 is behind us are:

- Focus on your people first – employees, customers, suppliers, partners – get them to a place of safety and where they feel some sense of security.
- Pinpoint your organization’s most critical driver of its business value. Is it the ability to deliver a key product or a core service, is it your online platform, is it your R&D?
- Identify the core elements that are needed to keep that critical driver of value for your organization in play.
- What must go right to keep that core value driver working?
- What assumptions are we having to make about our ability to get this critical driver back in play?
- Seek input from multiple people across the enterprise – don’t try to solve this challenge without multiple lenses on how certain actions might trigger issues across the enterprise.
- Communicate often and frequently.
- Assess the Damage and then Focus on Rebuilding After COVID-19 source, alternate options that you may have collected.

Read the full article and watch the Podcast at the NC State ERM Initiative.
In the last quarterly meeting, Gartner presented the most recent survey results on Emerging Risks. The survey identified the four emerging risks identified by both the public and private sectors.

First, Cyber Security Control Failures—companies will have to develop long term strategies to ensure infrastructure security and access management while on remote environment. The Second Wave—planning for potential or confirmed cases, or paused plans to return to the office due to spikes in cases following the winter season. Third, Remote Talent Management—as remote environment become the new normal, driving employee productivity will remain a challenge. Lastly, the New Working Mode—senior management and executives will need to come together to develop a plan to return to the office.

For detail information on the survey results, please read more [here](#).

**How to Reduce the Risk of Employee Change Fatigue**

**by Mary Baker**

Employees have endured months of rapid and constant organizational and business change and are battling concerns about the economy, job security, their health and the health of their loved ones. Integrating ERM framework with organization HR strategies can help organizations leaders develop effective strategies to reduce employees’ risk of fatigue — in particular by focusing on how employees experience change.

Employees’ risk of change fatigue is higher than ever. Focusing change management efforts on employee experience and making sure to manage day-to-day changes will help organizations reduce the risk of employee change fatigue.
